

## 2021-22 Daily Student Symptom and Exposure Protocol

Dear Parents/Guardians:

To support the health and safety of all staff and students while at school, we ask that all families complete the Daily Student Symptom and Exposure Protocol each morning before coming to school. We appreciate your cooperation and support.

Answer the following two (2) questions:

1. Has your child experienced one or more of the following symptoms in the last 48 hours?

- A fever of 100 degrees F or greater
- New cough, nasal congestion or runny nose
- Difficulty breathing
- New muscle ache or pain
- Extreme continuous fatigue
- Headache (that is not typical)
- Sore throat
- New loss of taste or smell
- Nausea, vomiting or diarrhea

2. Has your child been in close direct contact with someone who has tested positive for COVID-19 in the past 14 days?

If you answered yes to either question, you **must** keep your child home, even if their symptoms are mild.

Contact your school office and report your child's absence. They may not return to school until:

- You provide proof of a negative NAAT COVID-19 test result (e.g., PCR test) **AND**
- Your child has not had a fever for at least 24 hours without the use of fever reducing medications **AND**
- Your child's symptoms (e.g. cough, or shortness of breath) have improved **OR**
- Ten days have passed from the onset date of their first symptom
