## Preparing Your Family For An **Earthquake**

## The Plan

./	
	Stock up on at least a three-day supply of food, water, clothes, medical supplies and other necessary equipment for everyone in your family. Make sure everyone knows where to find them. (See the information sheet on emergency supplies in this packet.)
	Decide where and when to reunite your family should you be apart when an earthquake happens.
	Choose a person outside the immediate area to contact if family members are separated. Long distance phone service will probably be restored sooner than local service. Do not use the phone immediately after an earthquake.
	Know the policies of the school or daycare center your children attend. Make plans to have someone pick them up if you are unable to get to them.
	If you have a family member who does not speak English, prepare an emergency card written in English indicating that person's identification, address and any special needs such as medication or allergies. Tell that person to keep the card with him/her at all times.
	Conduct Earthquake: Duck, Cover & Hold drills every six months with your family.
	Know the safest place in each room because it will be difficult to move from one room to another during a quake.
	Locate the shutoff valves for water, gas and electricity. Learn how to shut off the valves before a quake. If you have any questions, call your utility company.
	Make copies of vital records and keep them in a safe deposit box in another city or state. Make sure your originals are stored safely.

When preparing for an earthquake, plan on having enough supplies to get you and your family through at least the first 72 hours. After a major earthquake, there's a good chance that traditional emergency response teams will be too busy to take care of you and your family. You need to prepare your home and neighborhood.

ch fii te	efore a quake occurs, call your local Red Cross napter and Office of Emergency Services to nd out about their plans for emergency shel- ers and temporary medical centers in case of uch a disaster.	
□ Es	stablish all the possible ways to exit your ouse. Keep those areas clear.	
	now the locations of the nearest fire and poce stations.	
	ake photos and/or videos of your valuables. Make opies and keep them in another city or state.	
	nclude your babysitter and other household elp in your plans.	
	eep an extra pair of eyeglasses and house and ar keys on hand.	
	eep extra cash and change. If electricity is ut, you will not be able to use an ATM.	
General Tips		

☐ Stay away from heavy furniture, appliances, large glass panes, shelves holding objects, and large decorative masonry, brick or plaster such as fireplaces.

☐ Keep your hallway clear. It is usually one of the safest places to be during an earthquake.

☐ Stay away from kitchens and garages, which tend to be the most dangerous places because of the many items kept there.
