

Snowflake Location Sentence Cards

Directions: Print off 2 copies so that you can play memory/concentration or put them in an envelope and have the students pull out a card and at the end of the activity count to see how many matches they made.

Uses: My plan was to use these cards to help children learn some basic concept words like “next to”, “beside”, “between”, “below”, “under”, “above”, “over”, and “behind”. The student needs to decide where the snowflake is in the picture and then make a sentence about the picture. For example, the student may say the snowflake is “over” and then make the sentence “The snowflake is over the sled”. Again with older or more advanced students you could have them compare different pictures so that they could use conjunctions in their sentences.

Enjoy and hope your students enjoy!
