'Imagining Our Vivid Vision' Committee to Recommend New Mission and Vision Statements, While Refining the District's Student Promotion Profile

SOLANA BEACH, CA (December 8, 2020) – When schools suddenly closed earlier this year, the [Solana Beach School District](#) was in the process of reimagining its mission and vision statements, as well as creating a student promotion profile to better reflect the 21st century skills and dispositions necessary for elementary students in today's changing world.

The *Imagining Our Vivid Vision* committee, made up of individuals from throughout SBSD's schools and communities, gathered virtually in late November to discuss and vote on its slate of mission and vision statements. The final statements will be presented for Board approval in early 2021. "Our aim is to create a mission statement that is intentional, reflects our district's core values, and one that everyone can restate and understand," said Superintendent Jodee Brentlinger. "The impetus behind this and a new vision statement, particularly in light of the immense changes in education today, is to provide a clear, enduring guide that leads us into an unknown future with wisdom and imagination. I truly appreciate the thoughtfulness and energy this committee has generated on behalf of our students." *(Photo: Online Scholars Assistant Principal Roderick Gayta during group session.)*

The committee will reconvene virtually on January 5, 2021, for the unveiling of its final mission and vision statement recommendations and to initiate the work to create the District's new recommended student promotion profile. For details, please contact Superintendent Jodee Brentlinger.
